

University of Iowa Hawkeye Poll – Topline Results
April 21, 2021
March/April poll of Iowans

Sample: 991 voting-age residents in Iowa, margin of error +/-3.2%.

About: The Hawkeye Poll was fielded March 23 to April 12, 2021.

The poll was conducted by the Hawkeye Poll Cooperative, comprised of University of Iowa faculty, graduate students, and undergraduate students in the political science and sociology departments. The poll is a teaching, research, and service project, which uses the facilities of the Iowa Social Science Research Center directed by Frederick J. Boehmke, professor of political science and faculty advisor for the poll. The Department of Political Science, the College of Liberal Arts and Sciences, and the University of Iowa Public Policy Center support the poll; financial support was provided through a Student Technology Fee award (#1290-91).

The Iowa Social Science Research Center (ISRC) assisted with data collection. Responses were gathered by phone (89) and by web (902). For the phone portion, the ISRC obtained a random sample of Iowans consisting of 40% household landline numbers and 60% mobile phone numbers. All respondents who stated they were over age 18 and willing to participate in the survey were included. After training, students in the class used the ISRC's computer-assisted interviewing resources to complete the calling and interviews. No quotas were set for the phone component. For the web portion, the ISRC contracted with a web panel vendor, Ipsos Observer, to field the survey to a demographically representative sample of 902 web respondents. Respondents invited to complete the web survey were Iowa adults, aged 18-120 years, recruited for participation via web panel. To obtain a census-representative sample, quotas were set on the following demographics: sex, age, and party identification.

Respondent Identification: All respondents who stated they were over age 18 and willing to participate in the survey were included. 902 responses were completed by web and 89 were completed by phone. To obtain a census-representative sample, quotas were set for the web data collection on the following demographics: sex, age, and urbanicity. No quotas were set for the phone data collection.

Weighting: Reported results are weighted by age, sex, and party identification.
